Re: Picillo Site, Coventry, R.I.

Dear Sirs:

This is in response to your October 27, 1987 letter identifying American Standard Inc. as a potentially responsible party with respect to the above-captioned site.

American Standard Inc. has no manufacturing facilities in the State of Rhode Island and, to my knowledge, never had. Since EPA apparently has reason to believe that hazardous wastes generated by a facility currently or previously owned by our company are present at the Picillo site, I would be grateful if you would furnish me with copies of the documents indicating such involvement.

Very truly yours,

Charles Gordon
